

Where Commodities Meet Digital Currency

BLOX

V1.2

D.E.B.T. IS THE FUTURE OF CRYPTO MINING

D.E.B.T. is a revolutionary decentralized eco-friendly blockchain technology network of autonomous software node operators who, together, create a blockchain ecosystem.

D.E.B.T. digital currencies are supported by real-world commodities through royalties from projects which are used to purchase tokens out of the ecosystem through the blockchain to add stability with tangible revenues. Projects include agriculture, bauxite, crude oil, gold, real estate, royalty cash flows, distribution channels and natural gas, just to name a few, with more projects to be announced.

The D.E.B.T. ecosystem benefits from the token burns that occur from the purchase of tokens from project royalties received. These royalties are generated from real-world physical commodities, products, and services.

GROWTH STRATEGY

As D.E.B.T. projects continue to launch, the ecosystem is becoming more robust. The key focus now is growth. Currently, there are multiple projects in the pipeline and new projects are being reviewed regularly. The diverse collection of real-world commodity projects contributes to the roadmap for creating benefit that can be used by D.E.B.T. software mining license holders, D.E.B.T. ecosystem token holders, as well as third-party token holders.

BLOCKCHAIN REAL ESTATE PROJECT (BLOX)

BLOX is the D.E.B.T. ecosystem real estate project that will bring huge growth and excitement to the D.E.B.T. community.

The BLOX Project is supported by multiple components of commercial real estate transactions. In the first 24 months, the BLOX Project is working with multiple institutions with the goal of collecting fees on over \$500 million in transactions. Royalties received will be used to purchase BLOX token out of the market to be burned.

In 2022, the real estate market was estimated at \$3.81 trillion USD. Although the industry can experience swings, it is expected to grow to be a \$5.85 trillion industry by 2030 with a current growth rate of 5.2% (source: <https://www.grandviewresearch.com/industry-analysis/real-estate-market>).

The D.E.B.T. ecosystem plans to take advantage of this growth and continue to find ways to utilize blockchain technology in real estate transactions. Blockchain technology has impacted the real estate industry in several ways in recent years. This advancement allows for a new means for buyers and sellers to connect, intermediaries are being cut out, reducing costs, and payments are now being accepted in crypto currency.

D.E.B.T.'s strategic partners will focus specifically on commercial real estate deals. Each real estate transaction generates fees. These fees are created through closings, loans, title work, agents, brokers, and more. The royalties from these fees will then be used to buy BLOX tokens out of the ecosystem supporting the deflationary tokenomics.

GET INVOLVED WITH

Become part of the D.E.B.T. community with the purchase of a BLOX Project mining license and take advantage of the growing real estate and crypto industries through the D.E.B.T. ecosystem.

Purchase your BLOX mining license today to earn daily rewards supported by deflationary tokenomics through royalties received from real estate transactions.

There are 600,000 software mining licenses, 300,000 available for retail and 300,000 controlled by the treasury. Retail licenses will be available at the following cost break down:

Licenses 1 - 50,000 will be purchased and eventually added to the rental pool.

BLOX SOFTWARE MINING LICENSE

All D.E.B.T. software mining licenses, including BLOX, must be hosted through one of several available hosting options. Each license can be assigned to VBOX, D.E.B.T.'s virtual machine hosting service, ad-hoc cloud hosting by D.E.B.T. via individual hosting credits, the downloadable D.E.B.T. Desktop application, or a third-party hosting service provider. For licensees utilizing the desktop application, the D.E.B.T. mining software is compatible with all MacOS, Windows and Linux operating systems, requires very little electricity, and standard internet service. The cost for hosting varies by option. For more details, see: www.thedebtbox.com/hosting.

COLLECT REWARDS

When your BLOX software mining license is active and connected to the internet, you will be rewarded with BLOX tokens for supporting the D.E.B.T. ecosystem. Each mining cycle is a 24-hour period beginning daily at 0:00 GMT (UTC). Rewards generated today are deposited to the BLOX Piggy Bank wallet within 24-hours.

Licensees may withdraw these rewards to a D.E.B.T. wallet using the dashboard. Rewards can then be stored, exchanged for other currencies, or used to make additional purchases on the D.E.B.T. platform. There is no guarantee the rewards will have any monetary value, which is subject to many factors, most of which are out of D.E.B.T.'s control.

TOKENOMICS

Tokenomics, also known as token economics, are the factors that determine the cryptocurrency's value.

The D.E.B.T. Blockchain Real Estate Project (BLOX) tokenomics have been designed based on the economic theory of supply and demand. As a deflationary token, the number of tokens in the ecosystem will continue to decrease, thus potentially increasing the value over time. With a set number of licenses and tokens that will ever exist, the BLOX Project tokenomics are supported by five areas:

- 600,000 BLOX software mining licenses will exist. 300,000 available for retail purchase and 300,000 treasury licenses.
- BLOX software mining license activation. \$1,000 worth of BLOX tokens (at current market value) are generated per license activated and added to the EGI pool, providing a finite number of tokens available in the ecosystem.
- Blockchain Real Estate (BLOX) project royalties will purchase token out of the ecosystem and burn them.
- Annual Halving. Beginning April 1, 2023, each year, 50% of the EGI pool will be burned.
- 10 % Transaction fees are charged for each transaction involving BLOX. This includes, but is not limited to withdraws, swaps, transfer, and purchases. 100% of these fees will be burned monthly.

A limited number of BLOX tokens will be available to be digitally mined, and thus placed into circulation by a limited number of software mining licenses (max 300,000 licenses). All BLOX tokens must be digitally mined by BLOX software mining license holders and will only be available for purchase through peer-to-peer or third-party digital currency exchanges.

This is not an Initial Coin Offering (ICO) project structure. Licensees are NOT making an investment into the BLOX Project, D.E.B.T., D.E.B.T.'s licensees, affiliates, or parents. The BLOX Project constitutes a fair launch protocol because possession of a license does not entitle a license holder a right to tokens. All BLOX tokens must be digitally mined by a license holder.

HOW IT WORKS

Blockchain Real Estate (BLOX)

The BLOX Project is an innovative way to be a part of the real estate industry through token rewards. Our strategic partnerships offer D.E.B.T. the ability to earn royalties generated by real estate transaction fees. These royalties shall be used to purchase BLOX tokens out of the BLOX Project ecosystem (i.e. burn) supporting the economic theory of supply and demand.

D.E.B.T. will continue to use its unique position to source additional royalty streams with the goal of increasing the size of token burns, further supporting the BLOX Project ecosystem.

In addition to the burn of royalties, the tokenomics include multiple ways to reduce the tokens in the ecosystem.

LICENSE ACTIVATION

For every BLOX software mining license activated, \$1,000 worth of BLOX tokens, based on the current market value, will be placed into the BLOX Ecosystem Growth Initiative (EGI) pool. This creates enough token in the ecosystem to be digitally mined. The purpose of the EGI pool is to hold the tokens until they are mined. The BLOX Project will make available only 300,000 retail software mining licenses. Licenses are not transferable, however, when all licenses are sold, the licenses will be converted to transferable NFTs, becoming a perpetual asset. D.E.B.T. will notify the BLOX Project community when the licenses convert to NFTs. The value of the NFTs will be dictated by the market at and may be different than the purchase price of a license.

To add continued support to the ecosystem, the D.E.B.T. Council will control 300,000 treasury licenses. These licenses will be used to manage liquidity pools, expand future development, continue to build, and support the stability of the D.E.B.T. ecosystem.

ECOSYSTEM GROWTH INITIATIVE POOL

The platform's BLOX Project Ecosystem Growth Initiative Pool is the pool of available rewards that the platform's algorithms will award to software license holders in accordance with the network protocol.

TRANSACTION FEES

The BLOX Project ecosystem has a 10% transaction fee. This fee applies to all transactions involving BLOX tokens. Including: withdraws, swaps, transfers, exchanges, and purchases. 100% of the transaction fees (also called a "tax" in the crypto industry) will be Project burn wallet and removed from the ecosystem forever.

ANNUAL BURN

Every year, beginning April 1, 2023, fifty percent (50%) of the BLOX tokens in the EGI pool will be sent to the burn wallet never to be seen again. In the cryptocurrency space, burning tokens is a process that reduces the issuance rate of new coins. More precisely, the periodical reduction of the block subsidy provided to digital miners. The reduction in tokens ensures that a crypto asset will follow a steady issuance rate until its maximum supply is eventually reached. This creates added value to the remaining tokens through the economic theory of supply and demand. This process only affects tokens in the EGI pool, not tokens that have been purchased or rewarded to software mining license holders. By reducing the number of tokens available in the EGI pool, the daily rewards awarded to software license holders will also be reduced. By creating scarcity of the token rewards, the demand goes up and the value of the remaining tokens potentially increases over time.

REWARDS

BLOX Project mining licenses that are active and communicating with the ecosystem will be rewarded with daily rewards. Each 24-hour cycle begins at 0:00 UTC (GMT) daily. Rewards will be prorated if the mining license is not active and connected to the internet for the full 24-hour period.

Daily rewards (mined tokens) are deposited to the Piggy Bank in the Rewards section of the D.E.B.T. Dashboard and can be withdrawn to a private D.E.B.T. wallet once the minimum balance requirement has been achieved.

Upon launch, peer-to-peer transfer of BLOX tokens will be available immediately. It is anticipated that the BLOX Project token will be listed on its first exchange within the first quarter of 2023 and will then be available for swap and exchange functionality.

D.E.B.T. COUNCIL

The D.E.B.T. Council is responsible for managing the ecosystem and working with strategic partners to add value for all software license and token holders. This is achieved by supplying liquidity to new markets, increasing the production value of projects, and providing liquidity for independent digital currency exchanges.

Supply Distribution

There are 4 main wallets where the majority of non-circulating tokens are held. All remaining wallet holders can be found on the Wallet Holders section of the token page on BSCScan (linked below).

| Name | Address | Purpose |
|------------------|--|---|
| EGI Pool | 0x9F252F68d2003B45aB73Ae7c9Fb5eC682275bb2d | Mining pool where the daily mining is distributed from. |
| Buy& Burn Wallet | 0x525d4E10E7903B61188C0D5ce54E281c2448E98c | Used to purchase tokens on the open market and send to the burn wallet as per the blockchain protocol. |
| Piggy Bank | 0x9671a47994D94B340843418E0582fc6e206CCf75 | Holds your rewards until you withdraw the rewards to your D.E.B.T. wallet |
| Payments Wallet | 0x02fBf65973d163127d03aB5a41228e053a216147 | All BLOX tokens that have been used to purchase BLOX mining licenses, will be held in this wallet until burned. |

Disclosures and Risks

It is important to know that the D.E.B.T. Box software mining license is not an investment, but the sale of software and/or hardware. Digital rewards produced by each license are not considered legal tender and are not backed by any government, thus the rewards have very few regulatory protections and are not insured against theft or loss by agencies such as the Federal Deposit Insurance Corporation or the Securities Investor Protection Corporation. This industry is new and comes with risks, including, but not limited to exchange rates, willingness of others to exchange fiat currency for the digital rewards, and consequently could decrease in value or hold no value at all. Additionally, regulatory changes at the state, federal or international level could negatively impact the production and exchange of digital rewards. Do your own research about the digital currency industry. Information has been provided to introduce you to the BLOX software mining license and is not meant to offer financial advice in any way.

*Currently, D.E.B.T. software mining licenses cannot be owned or operated by a citizen, domiciled in, resident of, or physically present / located in: Afghanistan, the Balkan Region, Belarus, Burma, Cuba, Democratic Republic of Congo, Iran, Iraq, North Korea, Sudan and South Sudan, Syria, Zimbabwe, Central African Republic, Lebanon, Mali, Nicaragua, Somalia, Venezuela, Yemen, Russia, or the Crimea, Donetsk, and Luhansk regions. Countries not listed MAY participate in building the D.E.B.T. blockchain.
