

Where Crypto Meets Commodities

# DRIP

**Water Blockchain Project  
Lite Paper**

# D.E.B.T. IS THE FUTURE OF CRYPTO MINING

D.E.B.T. is a revolutionary decentralized eco-friendly blockchain technology network of autonomous software node operators who, together, create a blockchain ecosystem.

D.E.B.T. digital tokens are supported by real-world commodities and services through royalties from projects which are used to purchase tokens out of the ecosystem through the blockchain to add stability with tangible revenues. Projects include agriculture, bauxite, crude oil, gold, real estate, distribution channels, and natural gas, just to name a few, with more projects to be announced.

The D.E.B.T. ecosystem benefits from the token burns that occur from the purchase of tokens from project royalties received. These royalties are generated from real-world physical commodities, products, and services.

## GROWTH STRATEGY

As D.E.B.T. projects continue to launch, the ecosystem is becoming more robust. The key focus now is growth. Currently, there are multiple projects in the pipeline, and new projects are being reviewed regularly. The diverse collection of real-world commodity projects contributes to the roadmap for creating benefits that can be used by D.E.B.T. mining license holders, D.E.B.T. ecosystem token holders, and third-party token holders.

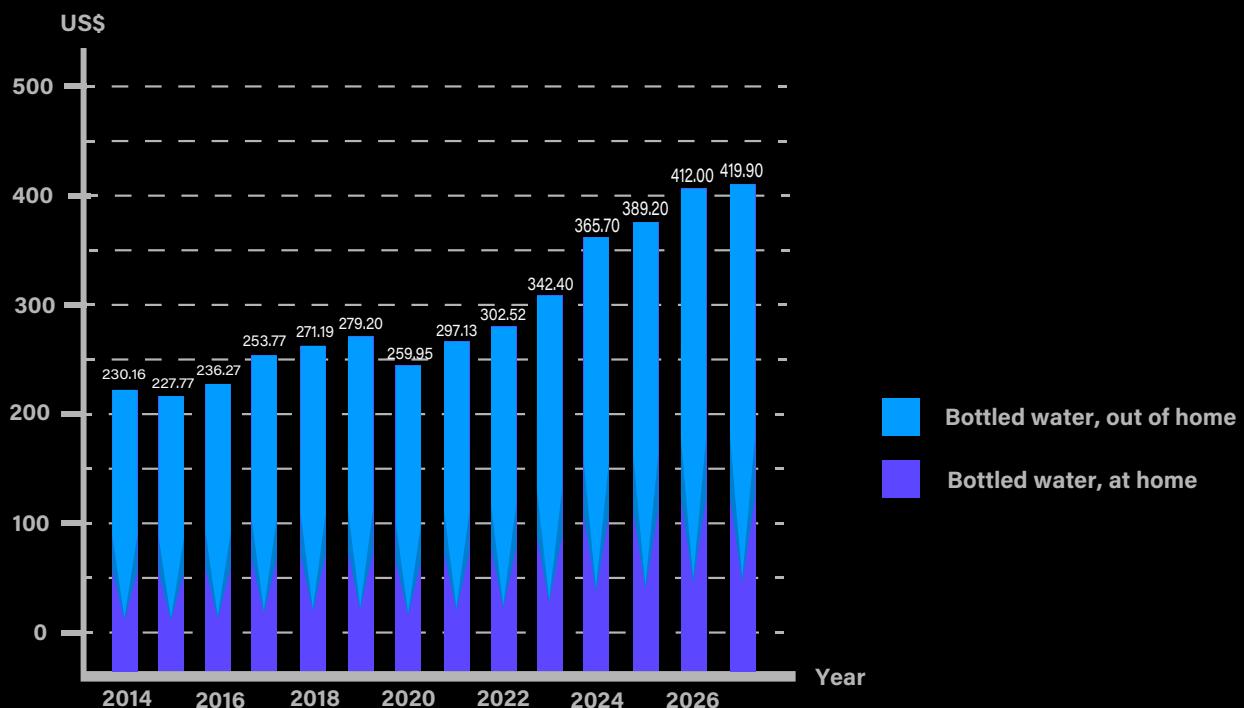

## D.E.B.T. AT A GLANCE

---

### WATER BLOCKCHAIN PROJECT (DRIP)

The Water Blockchain Project (DRIP) is supported by the physical production of water products. D.E.B.T. is revolutionizing the water industry (retail packaged water, including purified, spring, sparkling, distilled and flavored) by bringing it into the world of crypto. The water industry is currently valued at about \$342 billion dollars and is expected to increase at a compound annual growth rate (CAGR) of 5.24% per year from 2024 to 2027; this growth can be attributed to factors such as a higher demand for hygienic drinking water and increased health consciousness in consumers\*. As a part of the drip project, the D.E.B.T. Council will work closely with our partners to ensure a portion of all water sales will be used to drill wells in areas across the world that will benefit from access to clean drinking water.

### GET INVOLVED WITH DRIP

---

Become part of the D.E.B.T. community with the purchase of a DRIP mining license and take advantage of the water distribution and crypto industries through the growing D.E.B.T. ecosystem. Purchase your DRIP mining license today to earn daily rewards supported by half-life tokenomics.

There are 130,000 retail mining licenses available. Retail licenses will be available at the cost breakdown below. Note that licenses priced between \$4,000 or less can only be purchased with USDT, USDC, BNB, or DEBT, while licenses priced above that can be purchased with the aforementioned tokens as well as any D.E.B.T. project token.

License	Cost
1-1,000	\$7,500
1,001-2,000	\$7,000
2,001-3,000	\$6,500
3,001-4,000	\$6,000
4,001-5,500	\$5,500
5,501-7,500	\$5,000
7,501-10,000	\$4,500
10,001-13,000	\$4,000
13,001-17,000	\$3,500
17,001-22,500	\$3,000
22,501-30,000	\$2,500
30,001-40,000	\$2,000
40,001-55,000	\$1,500
55,001-80,000	\$1,000
80,001-105,000	\$750
105,001-130,000	\$500

The DRIP Project will also offer 2,000,000 micro licenses. A micro license is an affordable way to get involved with the D.E.B.T. ecosystem and provides 1% of the rewards generated by a retail perpetual mining license. Micro licenses can only be purchased with USDT. A micro license does not require the license holder to host the license and will operate perpetually but is not transferable and will not convert to a NFT at a later date.

## **DRIP MINING LICENSE**

---

All D.E.B.T. perpetual mining licenses, excluding micro licenses, must be hosted through one of several available hosting options. Each license can be assigned to VBOX, D.E.B.T.'s virtual machine hosting service, ad-hoc cloud hosting by D.E.B.T. via individual hosting credits, the downloadable D.E.B.T. Desktop application, or a third-party hosting service provider. For licensees utilizing the desktop application, the D.E.B.T. mining software is compatible with all MacOS, Windows, and Linux operating systems, and requires very little electricity and standard internet service. The cost for hosting varies by option. For more details, see [www.thedebtbox.com/hosting](http://www.thedebtbox.com/hosting).

## **COLLECT REWARDS**

---

When your DRIP mining license is active and connected to the internet, you will be rewarded with DRIP tokens for supporting the D.E.B.T. ecosystem. Each mining cycle is a 24-hour period beginning daily at 0:00 GMT (UTC). Rewards generated today are deposited to the DRIP Piggy Bank wallet within 24 hours.

You may withdraw these rewards to your D.E.B.T. wallet using the dashboard. Rewards can then be stored, exchanged for other currencies, or used to make additional purchases on the D.E.B.T. platform. There is no guarantee the rewards will have any monetary value, which is subject to many factors, most of which are out of D.E.B.T.'s control.

## TOKENOMICS

---

Tokenomics, also known as token economics, are the factors that determine how the cryptocurrency functions. Each project's specific tokenomics are programmed into its smart contract.

The D.E.B.T. Water Project (DRIP) tokenomics have been designed based on the economic theory of supply and demand. Tokens are mined from the Ecosystem Growth Initiative (EGI) pool on a half-life schedule. Each annual cycle, half of the tokens in the EGI pool are mined to mining license holders based on a synthetic mining algorithm that functions like other cloud mining algorithms, without requiring excessive energy and hardware costs. Fifty percent (50%) of the daily distribution will be awarded to standard mining license holders, and the other fifty percent (50%) will be mined to the treasury. With a finite number of licenses and tokens set to come into existence, the DRIP project tokenomics are supported by three areas:

- Water royalties
- DRIP mining license purchases: 130,000 retail licenses and 2,000,000 micro licenses available.
- A 10% transaction fee (including withdrawals, swaps, transfers, and purchases), half of which is distributed to standard license holders and half of which is vaulted

The DRIP Project smart contract does not have mint functions but still supports the economic theory of supply and demand through vaulting and burning tokens. Each year on July 1, the vault will release its tokens and those tokens will be burned. The EGI pool will match that vault burn amount. For instance, if 50,000 DRIP tokens are vaulted, then released from the vault and burned, 50,000 tokens will also be burned from the DRIP EGI pool.

One and a half billion (1,500,000,000) DRIP tokens will be available to be digitally mined, and thus placed into circulation, by a limited number of mining licenses. All DRIP tokens must be digitally mined by DRIP mining license holders and will only be available for purchase through peer-to-peer or third-party digital token exchanges.

This is not an Initial Coin Offering (ICO) project structure. Licensees are NOT making an investment into the DRIP Project, D.E.B.T., D.E.B.T.'s licensees, affiliates, or parents. The DRIP Project constitutes a fair launch protocol because possession of a license does not entitle a license holder a right to tokens. All DRIP tokens must be digitally mined by a license holder.

# WATER BLOCKCHAIN PROJECT

## HOW IT WORKS

### Water Blockchain (DRIP)

The DRIP Project is a revolutionary way to be a part of the recession-proof global water industry through token rewards. Our strategic partnerships and unique negotiating abilities offer D.E.B.T. the ability to earn royalties from the manufacturing of several water products. These royalties shall be used to purchase DRIP tokens out of the DRIP Project ecosystem (i.e. vault) supporting the economic theory of supply and demand.

D.E.B.T. will continue to use its unique position to source additional royalty streams from the water distribution sector with the goal of increasing the size of tokens vaulted and burned, further supporting the DRIP Project.

In addition to the vaulting of royalties, the tokenomics include multiple ways to reduce the number of tokens in the ecosystem.

### LICENSE

The DRIP project will make available only 130,000 retail mining licenses. Licenses are not transferable, however, when all retail licenses are sold, the licenses will be converted to transferable NFTs, becoming a perpetual asset. D.E.B.T. will notify the DRIP Project community when the licenses convert to NFTs. The value of the NFTs will be dictated by the market and may be different than the purchase price of a license.

### ECOSYSTEM GROWTH INITIATIVE POOL

The purpose of the EGI pool is to hold the tokens until they are mined. The platform's DRIP Project Ecosystem Growth Initiative (EGI) pool is the pool of available rewards that the platform's algorithms will award to software license holders in accordance with the network protocol.

### TRANSACTION FEES

The DRIP Project token has a 10% transaction fee. This fee applies to all transactions involving DRIP tokens, including withdraws, swaps, transfers, exchanges, and purchases. 50% of the fee will be distributed to standard license holders monthly, while the other 50% will be vaulted, and burned annually.

### REWARDS

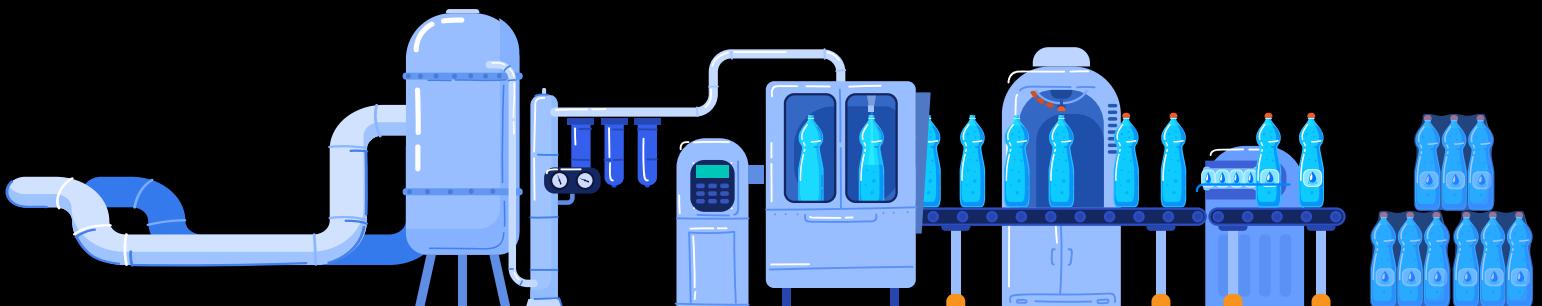

DRIP Project mining licenses that are active and communicating with the ecosystem will be rewarded with daily rewards (mined tokens). Each 24-hour cycle begins at 0:00 UTC (GMT) daily. Rewards will be prorated if the mining license is not active and connected to the internet for the full 24-hour period.

Daily rewards (mined tokens) are deposited to the Piggy Bank in the Rewards section of the D.E.B.T. Dashboard and can be withdrawn to a private D.E.B.T. wallet. Fifty percent (50%) of the daily distribution will be awarded to software license holders and the other fifty percent (50%) will be mined by the treasury.

Upon launch, peer-to-peer transfer of DRIP tokens will be available immediately. It is anticipated that the DRIP Project token will be listed on its first exchange within the third quarter of 2023 and will then be available for swap and exchange functionality.

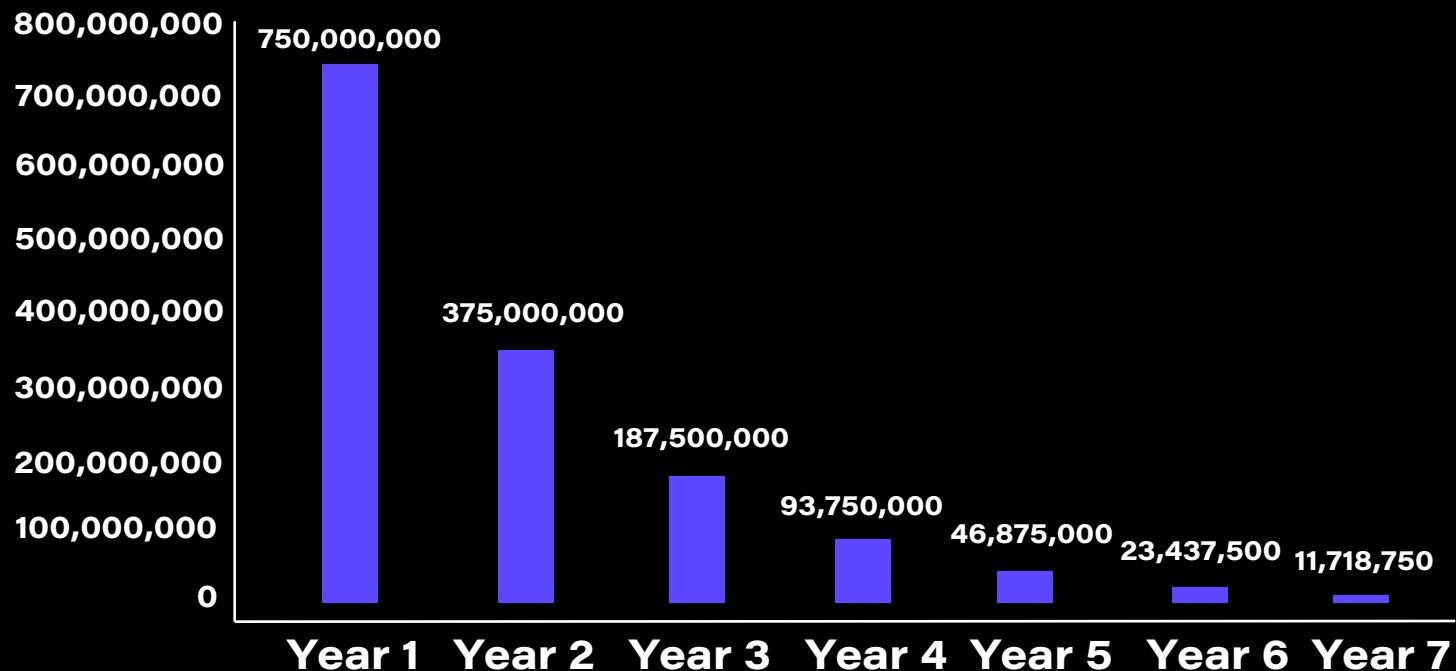

### D.E.B.T. COUNCIL

The D.E.B.T. Council is responsible for managing the ecosystem and working with strategic partners to add value for all license and token holders. This is achieved by supplying liquidity to new markets, increasing the production value of projects, and providing liquidity for independent digital token exchanges.

The DRIP token is a Binance Smart Chain BEP-20 token. It has a finite initial supply of 1.5 billion tokens. The DRIP token is a fixed supply token, meaning the max supply is set by the smart contract inception. All tokens are minted and deposited into the Ecosystem Growth Initiative (EGI) mining pool. The smart contract does not contain burn or mint functions.

The number of tokens in circulation is based on the synthetic, license-based mining rules and schedule. The distribution schedule for the DRIP token is below and continues indefinitely. Supply distribution amounts in the chart below do not reflect the amount of tokens that will be burned each year.

Name	Address	Purpose
EGI Pool	0x3322f8EFca45d7e868e79dE2dDE098a33480B9F8	Mining pool from where the daily mining is distributed.
Airdrop	0xD71FE0021b5d8228D745B7761f6a201cbe5A5B0a	Wallet used to airdrop tokens at the first of each month to all standard licenses owners (not Micro licenses).
Piggy Bank	0xAA81A5e14D30Ac58c415650b555b8f676cc0e70d	Holds your rewards until you withdraw the rewards to your D.E.B.T. wallet
Payments Wallet	0xD2174bE9728C9937AE9549f1aA01E98B4154A42E	All DRIP tokens that have been used to purchase DRIP mining licenses will be held in this wallet until burned.
Treasury	0x313e9a2a29d0b7966cD40100C44CFa1BE041De99	Responsible for managing the ecosystem and working to build value.

## DISCLOSURES AND RISKS

It is important to know that the D.E.B.T. mining license is not an investment, but the sale of software and/or hardware. Digital rewards produced by each license are not considered legal tender and are not backed by any government, thus the rewards have very few regulatory protections and are not insured against theft or loss by agencies such as the Federal Deposit Insurance Corporation or the Securities Investor Protection Corporation. This industry is new and comes with risks, including, but not limited to exchange rates, willingness of others to exchange fiat currency for the digital rewards, and consequently could decrease in value or hold no value at all. Additionally, regulatory changes at the state, federal, or international level could negatively impact the production and exchange of digital rewards. Do your own research about the digital currency industry. Information has been provided to introduce you to the DRIP mining license and is not meant to offer financial advice in any way.

\*Currently, D.E.B.T. mining licenses cannot be owned or operated by a citizen, domiciled in, resident of, or physically present / located in: Afghanistan, the Balkan Region, Belarus, Burma, Cuba, Democratic Republic of Congo, Iran, Iraq, North Korea, Sudan and South Sudan, Syria, Zimbabwe, Central African Republic, Lebanon, Mali, Nicaragua, Somalia, Venezuela, Yemen, Russia, or the Crimea, Donetsk, and Luhansk regions. Countries not listed MAY participate in building the D.E.B.T. blockchain.
